SKILLS

- **Languages:** C++, Python
- **Databases:** MySQL
- **Machine Learning:** Scikit-learn, Pandas, NumPy, Feature Engineering, Model Training, EDA
Model Evaluation, Supervised Learning, Unsupervised Learning
- **Tools/Platforms:** Power BI, MS Excel, Git, GitHub, Jupyter Notebook, Google Colab, VS Code
- **Soft Skills:** Problem-Solving, Quick Learner, Adaptability

PROJECTS

Medicare Disease Risk Prediction System | [GitHub](#) | [Live](#) Jan 2026 – Feb 2026

- Developed a machine learning solution to assess disease risk using patient health data for early detection.
- Constructed end-to-end ML pipelines using Python and scikit-learn, covering preprocessing, feature engineering, and exploratory analysis.
- Trained and compared classification algorithms including Logistic Regression, KNN, Naive Bayes, and Decision Tree for performance evaluation.
- Enabled risk stratification for cardiovascular and diabetic conditions to support data-driven clinical insights.
- **Tech:** Python, Pandas, NumPy, Scikit-Learn

Electric Vehicle Analysis Dashboard | [GitHub](#) | [Live](#) Nov 2025 – Dec 2025

- Analyzed the growing need to understand electric vehicle adoption patterns and performance metrics across different regions in the U.S.
- Built an interactive Power BI dashboard by cleaning and transforming raw datasets using Power Query and establishing structured data models for analysis.
- Applied DAX functions to compute key metrics including total vehicles, average range, YoY growth, and BEV vs PHEV comparisons.
- Engineered a visual analytics dashboard that enables stakeholders to explore state-wise trends, manufacturer insights, and adoption patterns through dynamic reports.
- **Tech:** Power BI, DAX, Power Query, Data Modeling, Data Visualization

Blinkit Sales Dashboard | [GitHub](#) Apr 2025 – May 2025

- Processed and analyzed the Maven Analytics dataset using Excel, Pivot Tables, and advanced formulas to extract actionable insights.
- Enabled data-driven decision-making by defining key KPIs and transforming raw data into structured analytical reports.
- Designed and developed a dynamic Excel dashboard with 12+ interactive visualizations displaying sales trends by category, size, and time period
- Improved reporting efficiency by 40% by automating data summaries, filters, and drill-down analysis using Pivot Tables and Slicers.
- **Tech:** Excel, Pivot Tables, Charts

TRAINING

Data Structures & Algorithms using C++ | [Lovely Professional University](#) Aug 2025

- Completed hands-on training in core Data Structures and Algorithms, focusing on arrays, linked lists, stacks, queues, trees, graphs, sorting, and searching techniques.
- Strengthening problem-solving skills by implementing optimized algorithms in C++ and practicing complexity analysis for efficiency.

CERTIFICATES

- Data Structures & Algorithms | [LPU](#) Dec 2024
- Object-oriented Programming (CPP) | [LPU](#) Dec 2024

ACHIEVEMENTS

- Solved 150+ Data Structures and Algorithms problems on LeetCode and GeeksforGeeks. Aug 2025 -Present
- Awarded Certificate of Merit – Data Structures and Algorithms (Grade A), Lovely Professional University. Aug 2025

EDUCATION

Lovely Professional University Phagwara, Punjab
Bachelor of Technology in Computer Science and Engineering: **CGPA: 7.20** Aug 2023 – Present

Shivam Convent Patna, Bihar
Intermediate: **Percentage: 62.20** Apr 2021 – Jul 2023

St. Joseph's High School Patna, Bihar
Matriculation: **Percentage: 65.20** Apr 2020 – Jul 2021
